About me

I am fascinated by technology, particularly robotics and graphic design. With a solid foundation in creative thinking and technological skills, I am continually seeking for new methods to mix art and technology to produce novel solutions. My command of the English language enables me to have access to worldwide knowledge and broaden my collaborative network. I believe that innovation and adaptability are essential for success in my field.

WORK EXPERIENCE

Teaching Assistant

VMG   2023-2024

• Supervised children during activities and play, helping maintain safety and proactively address behavioural problems.

• Assisted teacher with marking assignments and reporting feedback to students and parents.

• Helped students master learning concepts through one-on-one and small group tutoring.

• Offered students one-on-one assistance with class assignments and activities.

Galactic Problem Solver

Nasa Space Apps Challenge   2024-2024

• Determined strengths and weaknesses of established processes and practices.

• Monitored engineering process from conceptual phase through construction, helping to execute projects on time and within budget.

EDUCATIONAL BACKGROUND

RMIT

Robotics and Mechtronics   *2022-Curent*
